FULL STACK DEVELOPER

Full-stack developer building business web applications with **React**, **TypeScript**, **ASP.NET Core**, **Node.js**, Laravel, and **SQL databases**. Experienced through independent projects in designing **REST APIs**, **authentication** and **role-based access**, **transactional** workflows, dashboards, **real-time features**, and **AI-assisted automation**. Seeking a junior full-stack, frontend, backend, or web-development role.

TECHNICAL SKILLS

Frontend: React 18/19 · TypeScript · JavaScript · Next.js · HTML · CSS · Tailwind CSS · Inertia.js
Backend: ASP.NET Core (.NET 8) · Node.js · Express.js · Laravel 11/12 · PHP · Python · Java
Databases: PostgreSQL · Microsoft SQL Server · MySQL/MariaDB · Supabase · SQL · Dapper · EF Core · Eloquent
Tools & Integrations: Git · Docker · REST APIs · NodeMailer · Socket.io · Laravel Reverb · JWT · WebSockets · Tesseract.js OCR · Google Gemini API · Ollama/LLaVA · Telegram Bot API · Open-Meteo API

SELECTED INDEPENDENT PROJECTS

DormFix — Dormitory Management System | Live Demo **2025–Present**
React, TypeScript, Express, SQL Server
• Built a full-stack system for tenant onboarding, room allocation, **payment-record review**, maintenance requests, and **landlord-tenant messaging**.
• Implemented **SQL transactions** for room assignment and tenant workflows to prevent inconsistent capacity and assignment records.
• Added **Socket.io messaging**, role-based workflows, **OCR-assisted payment review**, and automated maintenance-ticket classification.

PharmaLink — Pharmacy POS & Inventory System | Live Demo **2025–Present**
React, ASP.NET Core, PostgreSQL
• Developed a pharmacy POS and inventory application with sales processing, low-stock monitoring, analytics, and administrator/pharmacist workflows.
• Implemented **atomic checkout transactions** across sales, sale items, and inventory deductions using **Dapper** and PostgreSQL transactions.
• Built **JWT authentication**, **role-based API authorization**, protected frontend routes, and responsive dashboard interfaces.

IsdaLog — Maritime Catch Logging & Auction Platform | Live Demo **2026–Present**
Laravel, Node.js, PostgreSQL, Supabase
• Built catch-logging and operational tools with **photo-based inspection workflows**, **weather data**, and **compliance-oriented notifications**.
• Developed **live auction workflows** with **Laravel database locking** to protect concurrent bids.
• Integrated **Supabase Storage**, Telegram, **Google Gemini** (AI integrations), Ollama/LLaVA, Open-Meteo, and Laravel Reverb.

CentraLog — Institutional Asset Tracking System | Live Demo **2026–Present**
React, ASP.NET Core, MySQL
• Built an asset-management application for asset registration, transfers, maintenance tracking, depreciation, **QR-code labels**, and audit records.
• Implemented a **depreciation module** supporting Straight-Line and Double-Declining Balance calculations.
• Added **transaction-based bulk asset transfers**, **background maintenance processing**, JWT authentication, and **five-role access control**.

EDUCATION

Bachelor of Science in Information Technology
Dipolog Medical Center Incorporated, Dipolog City
