PROFESSIONAL SUMMARY

Full-stack developer and BS Information Technology student building business web applications with React, TypeScript, ASP.NET Core, Node.js, and Laravel. Project experience includes **REST APIs**, **role-based access control**, **SQL transactions**, real-time messaging, and AI-assisted workflows.

TECHNICAL SKILLS

Languages: TypeScript · JavaScript · C# · PHP · SQL · Python

Frontend: React · Next.js · HTML · CSS · Tailwind CSS · Inertia.js

Backend and Data: ASP.NET Core (.NET 8) · Node.js · Express · Laravel · PostgreSQL · SQL Server · MySQL · Dapper · Entity Framework Core

Tools and Integrations: Git · Docker · JWT · Socket.io · Laravel Reverb · Tesseract.js · Gemini API · Ollama

SELECTED PROJECTS

CentraLog | Asset Tracking System — 2026-Present

React · TypeScript · ASP.NET Core · MySQL · Entity Framework Core | Live Demo

- Built asset registration, custody transfers, maintenance tracking, QR-code labels, and audit records; implemented straight-line and double-declining depreciation calculations.
- Wrapped bulk asset transfers in **database transactions**; added a background maintenance worker and **JWT authentication** with **five-role access control**.

IsdaLog | Catch Logging and Auction Platform — 2026-Present

Laravel · React · Inertia.js · Node.js · Laravel Reverb | Live Demo

- Built catch-logging and live auction workflows, using **database row locks** to coordinate concurrent bids and **Laravel Reverb** to broadcast updates.
- Integrated a Telegram bot with **Gemini** and local **Ollama** vision fallback for photo-based catch classification; added weather data and delivery verification workflows.

PharmaLink | Pharmacy POS and Inventory System — 2025-Present

React · TypeScript · ASP.NET Core · PostgreSQL · Dapper | Live Demo

- Implemented **atomic checkout transactions** across sales, line items, and stock deductions using **Dapper** and **PostgreSQL**, rolling back partial writes on failure.
- Built **JWT authentication**, administrator/pharmacist API authorization, protected frontend routes, and dashboards for revenue, low-stock alerts, and expiring inventory.

DormFix | Dormitory Management System — 2025-Present

React · TypeScript · Node.js · Express · SQL Server · Socket.io | Live Demo

- Built tenant onboarding, room allocation, payment review, and maintenance requests; used **SQL transactions** to keep room assignments and capacity records consistent.
- Added landlord-tenant messaging, role-based approval workflows, **OCR-assisted payment review** with **Tesseract.js** and **Ollama**, and automated maintenance-ticket classification.

EDUCATION

Bachelor of Science in Information Technology — **Expected August 2027**

Dipolog Medical Center Incorporated, Dipolog City
